

CL15

CO2 Laser Surgery System

Features

1. Laser controlled by microcomputer with advanced technology
2. Complete safety system to ensure maximum safety
3. Output power and irradiating time can be read directly from digital faceplate.
4. Adoption of selectable key units of laser power
5. Adjustable aiming beam power to provide with optimum surgical condition
6. Cooling system fault alarm
7. Scope of application: gynaecology, dermatology, ENT, urology, anorectal, physiotherapy

Technical Specifications

PARAMETER	SPECIFICATION
Output Power	15w
Pulse Width	0.1-2ms
Pulse mode	Ultra, continuous pulse
Laser spot size	0.1-0.5mm
Wavelength	10600nm
Cooling system	Air Cooling
Articulated arm	7 joint spring-balanced
Working radius	110cm
Packing	88*44*37cm, 15/20kg
