

CL20

CO2 Laser Surgery System

Features

1. Laser controlled by microcomputer with advanced technology
2. Complete safety system to ensure maximum safety
3. Adjustable pulse width and interval of complete flexibility and application
4. Adoption of selectable key units of laser power
5. Adjustable aiming beam power to provide with optimum surgical condition
6. Automatic test the obstacle and notice the user by displaying figure
7. Scope of application: gynaecology, dermatology, ENT, general surgery and others: underarm odour, corn, ulcer

Technical Specifications

PARAMETER	SPECIFICATION
Output Power	15w
Display	8 inch color LCD control display
Pulse Width	0.1-2ms
Pulse mode	Ultra, continuous, single, repeat pulse
Laser spot size	0.1-0.5mm
Wavelength	10600nm
Cooling system	water Cooling
Articulated arm	7 joint spring-balanced
Working radius	110cm
Packing	55*32*79cm, 16/21kg
