

CL30

CO2 Laser Surgery System

Features

1. Laser controlled by Microcomputer with advanced technology.
2. Complete safety system to ensure maximum safety.
3. Adjustable pulse width and interval for complete flexibility and application.
4. Adoption of selectable key units of laser power.
5. Adjustable aiming beam power to provide with optimum surgical condition.
6. Automatically test the obstacle and notice the user by displaying figure.
7. There is blow to smoke device can protect the lens
8. Scope of application: dermatology, ENT, anorectal, physiotherapy

Technical Specifications

PARAMETER	SPECIFICATION
Output Power	25w
Display	8 inch color LCD control display, automatic detection and display fault
Pulse Width	0.1-2ms
Pulse mode	Ultra, continuous, single, repeat pulse
Output mode	CW, Single Pulse, Repeat Pulse, Super Pulse

Treatment Size	20*20mm ² (Adjustable)
Laser spot size	0.1-0.5mm
Wavelength	10600nm
Cooling system	Air Cooling
Articulated arm	7 joint spring-balanced
Working radius	110cm
Packing	50*52*116cm, 33/45kg
