

HH-8300

VET Hematology Analyzer

(3-Part)

Features

1. 21 parameters, 3 histograms
2. 60 samples/H, open sampling
3. Can test 11 kinds of animals, 14 kinds of animals can customized
4. Anticoagulant whole blood mode. anticoagulant capillary whole blood mode, prediluted blood mode
5. whole blood mode 9.6ul/test
6. 10 inches capacitive touch screen

Technical Specifications

PARAMETER	SPECIFICATION
Multi-language	Chinese、English、French、Spanish、Russian,Ukrainian.
Testing principle	Electrical impedance,SFTmethod for hemoglobin.
Report	24 parameters: WBC,HGB,LYM#,LYM%,MID#,MID%,GRA#,GRA%, RBC,HCT,MCV,MCH,MCHC,RDW-CV,PLT,RDW-SD, MPV,PCT,PDW,P-LCR,P-LCC,RBC histogram,WBC histogram,PLT histogram.
Animals pecies	Can test 11 kinds of animals: dog,cat,horse,pig,cow,

	sheep,monkey,mouse,goat,rabbit,potbellied pig.In addition, 14 kinds of animals can be customized.
Throughput	60T/H
Sample volume	Whole blood 9.6μl,prediluted capillary blood 20μl.
Data storage	Storing over 200000 samples (histogram, patient information),combined search mode as permany conditions, combined preview for output data
Print mode	Optional connection with every kinds of external printer.
Blood sample mode	Venous wholeblood,capillary whole blood, prediluted blood.
