

S34 LED Light Curing Unit (External)

Technical Specifications

Optional aluminum enclosure material

Three working modes selection (high-light mode, pulse mode, fade mode)

Time mode adjustable from 5 seconds to 40 seconds

Automatic standby / no operation 20 seconds automatic power off

5W high power LED

low battery indicator

Long standby time: more than 90 days

Once charged, it can be used continuously for more than 500 times according to the calculation of 10 seconds each time

Rechargeable battery capacity: 2200mA/h3.7v

Operating Voltage: AC100-240V 50/60Hz

Wavelength: 420-480nm

Optical power: $\geq 1600\text{mw/cm}$

Curing time and depth: 5 seconds/3mm

Functions

Used to give light to solidify the light-cured material.
