

UT01

Backfat Measurement Instrument

Features

1. One-hand operating host. Holding the device, press the Test button with thumb to achieve the test and the result directly and efficiently. One-key to measure 3 level back-fat thickness. Measuring range is 4~35mm and the error is ± 1 mm.
2. Built-in battery to drive the host for 10 hours outdoor work. Auto switch-off after 2 minutes non-work to save power.
3. The probe is fully enclosed design to prevent water spray and splash water.
4. Smaller host similar with cigarette size, pocket-carrying design.
5. USB port design for host charge.
6. Compact and flexible overall design. Integrated host and probe design.
7. Accompanied by the army-green shell and the membrane keyboard design, the overall appearance looks more atmospheric and resistance to use.
