

X-10P High Frequency Dental X-ray Unit

I. Technical Specifications

Power supply: AC100V-240V, 50/60HZ

Frequency: 200KHZ

Tube voltage: 60KV

Tube current: 2mA

Exposure time: 0.2-3.2s

Distance from skin to cone: 140mm

Tube focus: 0.4mm*0.4mm

Battery: 14.8V, 6600mAh

Leak radiation: Outside one meter $\leq 0.002\text{mGy/h}$
(National standard: 0.25mGy/h)

II. Features

- This portable dental X-ray unit is high frequency machine.
- The body is small size, light weight.
- Memory function, just once exposure, can memory exposure parameters forever.
- It is LCD screen, all function could see clearly.
- Tact switches, smart control, convenience operating.
- High frequency power supply, low radiation, handsome appearance.
- Developing in light room, image in one minute, be used for diagnoses at once.
